DIGITAL TRANSFORMATION – A NEW WAY OF LIFE

Business Prospects in Digital World

Digital Technologies are transforming and influencing our daily life, societies and business in a big way. Creation of new technologies provide ample of opportunities for business and new markets to emerge, but at the same time it is also necessary to understand the challenges that are associated with such transformation such as changing customers' expectations, outdated regulations and updating the skills.

For success in the digital world, it is very important not only to achieve the targets in the fastest way but also to provide the highest degree of customers' satisfaction. Every business has to evolve in line with changing customer requirements. Information Communication Technology (ICT) acts as a catalyst in this transformation. Cloud computing, IOT and Big Data analytics are among the core technology groups that drive the market evolution. It is necessary to understand every major aspect of these challenges, the impact on the business and developing a strong and timely market response for continuous success and growth in this field.

Other key component of this digital transformation technology is to modify an organization's structure, procedures as well as its people/ work force spread across all the offices including field units. For that it would require collecting and collating high volumes of data to understand, influence and act according to customers' behavior.

The challenges in the journey of digitizing the business are manifold, but this transformation can be done in an incremental way without much pain.

PS3G has identified four steps in the journey of Digital Transformation of any industry/business

Identification of opportunities for digital disruption

- Each industry has its own unique opportunities
- Identify relevant digital innovations
- Feasibility of creating new business model using multiple Disruptions

Development of Business Strategy

- Customers expect every time the best experience
- Begin with customer expectations and work inwards
- Analyze the data to match customers technologies so as to meet their expectations

To develop a strategy for connecting the entire workforce and offices

- Improve the connectivity and visibility of all offices including field units and thereby the customer's experience
- Identify areas for reducing operational costs

Capacity building program and Cultural Change

- Employee participatory training program towards a unified goal
- Interaction with leadership and all stakeholders
- Exchange innovative thinking and develop opportunities for digital disruption
